

COURSE MODULES OF THE SUBJECT TAUGHT FOR THE EVEN SESSION- 2024-25

Course Syllabi with CO's

Faculty Name	:	Academic Year: 2024-25 (EVEN SEMESTER)									
Department: Mathematics											
Course Code	Course Title	Core/Elective	Prerequisite	Con Ho	ntact urs		Total Hrs/				
			1	L	Т	Р	Sessions				
BCS405A	DISCRETE MATHEMATICAL STRUCTURES	Core	Logics, Relations, functions, Group Theory	2	2	-	40				
Objectives	 To help students to understand discrete and continuous mathematical structures. To impart basics of relations and functions. To facilitate students in applying principles of Recurrence Relations to find the generating functions and solve the Recurrence relations. To have the knowledge of groups and their properties to understand the importance of algebraic properties relative to various number systems. 										

Topics Covered as per Syllabus Module-1: Fundamentals of Logic

Basic Connectives and Truth Tables, Logic Equivalence – The Laws of Logic, Logical Implication – Rules of Inference. The Use of Quantifiers, Quantifiers, Definitions and the Proofs of Theorems.

Module-2: Properties of the Integers

Mathematical Induction, The Well Ordering Principle – Mathematical Induction, Recursive Definitions. Fundamental Principles of Counting: The Rules of Sum and Product, Permutations, Combinations – The Binomial Theorem, Combinations with Repetition.

Module-3: Relations and Functions

Cartesian Products and Relations, Functions – Plain and One-to-One, Onto Functions. The Pigeon-hole Principle, Function Composition and Inverse Functions.

Properties of Relations, Computer Recognition – Zero-One Matrices and Directed Graphs, Partial Orders – Hasse Diagrams, Equivalence Relations and Partitions.

Module-4: The Principle of Inclusion and Exclusion

The Principle of Inclusion and Exclusion, Generalizations of the Principle, Derangements – Nothing is in its Right Place, Rook Polynomials.

Recurrence Relations: First Order Linear Recurrence Relation, The Second Order Linear Homogeneous Recurrence Relation with Constant Coefficients.

Module-5: Introduction to Groups Theory

Definitions and Examples of Particular Groups Klein 4-group, Additive group of Integers modulo n, Multiplicative group of Integers modulo-p and permutation groups, Properties of groups, Subgroups, cyclic groups, Cosets, Lagrange's Theorem.

List of Text Books

1. Ralph P. Grimaldi, B V Ramana: "Discrete Mathematical Structures an Applied Introduction", 5th Edition, Pearson Education, 2004.

2. Ralph P. Grimaldi: "Discrete and Combinatorial Mathematics", 5th Edition, Pearson Education. 2004.

List of Reference Books

1. Basavaraj S Anami and Venakanna S Madalli: "Discrete Mathematics – A Concept-based approach", Universities Press, 2016

2. Kenneth H. Rosen: "Discrete Mathematics and its Applications", 6th Edition, McGraw Hill, 2007.

3. Jayant Ganguly: "A Treatise on Discrete Mathematical Structures", Sanguine-Pearson, 2010.

4. D.S. Malik and M.K. Sen: "Discrete Mathematical Structures Theory and Applications, Latest Edition, Thomson, 2004.

5. Thomas Koshy: "Discrete Mathematics with Applications", Elsevier, 2005, Reprint 2008.

	Course Outcomes:							
Course Outcomes	 At the end of the course, the student will be able to: 1. Apply concepts of logical reasoning and mathematical proof techniques in proving th statements. 2. Demonstrate the application of discrete structures in different fields of computer scie 3. Apply the basic concepts of relations, functions and partially ordered sets for comput representations. 4. Solve problems involving recurrence relations and generating functions. 5. Illustrate the fundamental principles of Algebraic structures with the problems relate science & engineering. 							
Internal Assessment Marks: 50 (3 Session Tests are conducted during the semester, each IA for								

for 25 marks and Each assignment shall be conducted for 25 marks. (If two assignments are conducted then the sum of the two assignments shall be scaled down to 25 marks) The final CIE marks of the course out of 50 will be the sum of the scale-down marks of tests and

assignment/s marks. .Total 100M is scaled down to 50M).

The Correlation of Course Outcomes (CO's) and Program Outcomes (PO's)
