

About the Event

As part of its commitment to social responsibility and community outreach, ATME College of Engineering, Mysuru, through the Department of CSE – Cyber Security and the Department of Computer Applications, in association with the Institute of Engineers (IEI), Mysuru, is organizing a one-day Public Awareness Program on Cyber Frauds. The program aims to educate the general public about the growing threats of cyber crimes and online frauds in today's digital era. It focuses on creating awareness about common cyber fraud techniques, safe online practices, and preventive measures to protect personal and financial information. Through expert talks and interactive sessions, the event seeks to empower citizens with practical knowledge to recognize cyber threats and promote responsible and secure digital behavior.

Objective of the Event

- To create awareness among the general public about common cyber frauds and emerging cyber threats.
- To educate participants on safe digital practices, including responsible and secure use of social media platforms.
- To provide practical guidance on identifying online scams, phishing attempts, and fraudulent communications.
- To familiarize participants with preventive measures, cyber safety tools, and cyber crime reporting mechanisms.

Outcome of the Event

- Participants will gain the ability to recognize and avoid cyber frauds and online scams.
- Enhanced understanding of safe social media handling, including privacy settings, content sharing, and protection against impersonation and misuse.
- Improved awareness of secure online behavior in digital payments, messaging platforms, and web usage.
- Increased confidence among participants in responding to cyber threats and reporting cyber crime incidents through appropriate channels.

ATME College Of Engineering

ATME College of Engineering (ATMECE), Mysore, established in the year 2010, is approved by AICTE, New Delhi and is affiliated with Visvesvaraya Technological University, Belagavi, Karnataka. ATMECE is accredited by the National Board of Accreditation for undergraduate programs. ATMECE is rated GOLD by QS I-GAUGE for its overall excellence and is an ISO 9001-2015 certified college.

The college has been honored as “The Best Emerging Private Engineering College in Karnataka” along with “Most Promising Upcoming Private Engineering College in Karnataka” for two consecutive years.

ATME is proud to achieve NABL accreditation under ISO/IEC 17025:2017. All departments at the institute have established recognized research centers by VTU.

The institute has secured over Rs. 5 crores in external funding for various research & consultancy projects over the past five years. The institute has collaborations with more than twenty-five industries and institutes worldwide.

Courses Offered

Under Graduate Programs

- Civil Engineering
- CSE - (Data Science)
- CSE - AI & ML
- Mechanical Engineering
- CSE - Cyber Security
- Computer Science & Engineering
- Computer Science & Design
- Electrical & Electronics Engineering
- Electronics & Communication Engineering
- Bachelor of Computer Applications (BCA)
- B.Sc. Honors

Post Graduate Programs

- Master of Computer Applications (MCA)
- Master of Business Administration (MBA)

About the Dept CSE-Cyber Security

The Department of Computer Science and Engineering – Cyber Security was established in the year 2023 at ATME College of Engineering (ATMECE), Mysuru, with a vision to develop skilled cybersecurity professionals for the digital era.

The program offers in-depth domain knowledge combined with intensive hands-on training, real world problem solving, and industry-driven projects. Students gain strong practical exposure to ethical hacking and cyber defense techniques using industry-standard tools such as Kali Linux, Nmap, Metasploit Framework, Burp Suite, OWASP ZAP, SQLmap, and many more. Through strategic collaborations with reputed companies and professional organizations, the department provides advanced training and certification opportunities. These partnerships ensure real-time industry exposure, equipping students with the technical competence, confidence, and professional readiness required to excel in today's cybersecurity landscape.

About the Department of MCA

Applications play a vital role in communication, information management, and the advancement of emerging technologies such as artificial intelligence and automation.

The Department of Master of Computer Applications (MCA) was established in 2023 at ATME College of Engineering (ATMECE), Mysuru, with the objective of delivering quality higher education in the computing domain. The department emphasizes hands-on laboratory training, real-time projects, interactive teaching, case studies, and problem-solving approaches to ensure practical learning.

Industry experts contribute to curriculum design and course delivery, and the department aims to strengthen industry collaborations and MoUs for student training, internships, seminars, and project work, ensuring strong industry readiness and career development.

Need for a Public Awareness Program on Cyber Frauds

In today's rapidly digitalizing society, online platforms have become an integral part of daily life for communication, banking, shopping, education, and governance. While digital technologies offer convenience and efficiency, they have also led to a significant rise in cyber frauds and online financial crimes.

Many individuals including students, senior citizens, small business owners, and rural users lack adequate awareness of cyber threats such as phishing, OTP scams, fake calls, UPI frauds, identity theft, malicious links, social engineering attacks, and online investment scams. Cyber criminals exploit this lack of knowledge, resulting in severe financial losses, emotional stress, and misuse of personal data.

A Public Awareness Program on Cyber Frauds is therefore essential to:

- Educate citizens about common and emerging cyber fraud techniques.
- Create awareness on safe digital practices and responsible online behavior.
- Demonstrate real-life fraud scenarios and preventive measures.
- Inform the public about legal provisions, cyber laws, and grievance redressal mechanisms.
- Promote cyber hygiene and digital trust among the community.

The program also supports national digital safety goals and strengthens community resilience against cyber threats.

By conducting this event, the institution fulfills its social responsibility and community outreach commitment, contributing toward building a safer, smarter, and cyber-aware society.
